## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Takeuchi et al. (US 6586827).

Regarding claim 10, Takeuchi discloses a semiconductor device substrate (Figs. 1-9), comprising:

A substrate layer including an insulating layer (1, Figs. 1-9) and an interconnection layer (10, Figs. 1 and 9), the insulating layer and the interconnection layer being stacked;

An electronic component (4, Figs. 1, 3-9) buried in the insulating layer (1, Figs. 1-9), a bump (90, Figs. 1, 8-9) being formed on the electronic component acting as an electrode of the electronic component; and

A base layer (16, Figs. 1 and 9) that is disposed in contact with the insulating layer of the substrate layer, the base layer (16, Figs. 1 and 9)having an opening (vias)

formed at a portion corresponding to the electronic component to accommodate an externally provided semiconductor element (19, Fig. 1), at least an end of the bump (90, Figs. 1, 8-9) being exposed in the opening (vias) for connection of the electronic component (4, Fig. 1) to the semiconductor element (19,Fig. 1) in the opening (Figs. 1, 9 and Col. 3).

Regarding claim 11, Takeuchi further discloses wherein the bump (90) projects through the substrate layer so as to be connectable to an externally provided semiconductor element (Figs. 1, 8-9 and Col. 3).

Regarding claim 12, Takeuchi further discloses wherein the bump (90) projects from a surface of the electronic component facing the opening so as to be connectable to an externally provided semiconductor element (Figs. 1, 8-9 and Col. 3).

Regarding claim 13, Takeuchi further discloses wherein the substrate layer has a depressed portion (7, Fig. 6) between the opening and the electronic component to expose the bump (Col. 3).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas M. Menz whose telephone number is 571-272-1877. The examiner can normally be reached on M-F 8-5.
